JEFFERSON TWP., LINCOLN CO., MAINE

AREA 109 ACRES

# LITTLE DYER POND

Jefferson Twp., Lincoln Co.  
U.S.G.S. North Whitefield, Me. (7.5')

## Fishes

Smallmouth bass  
Largemouth bass  
Chain pickerel  
Minnows  
Golden shiner

White sucker  
Hornpout (bullhead)  
Pumpkinseed sunfish  
American eel

## Physical Characteristics

Area - 109 acres

Maximum depth - 19 feet

Temperatures:

Surface - 71°F

19 feet - 58°F

Principal fisheries: Smallmouth bass

Little Dyer Pond is relatively shallow with a maximum depth of 19 feet. An oxygen deficiency exists at depths of 15 feet and over. Poor spawning and nursery habitat is available for coldwater sportfish. Therefore, management is for the present good smallmouth bass fishery.

There is no state-owned boat launch facility on Little Dyer Pond. Launching a canoe at an unimproved facility located on the outlet stream will provide access to both Little Dyer Pond and Kerr Pond.

Surveyed - August, 1960
